Education

Oregon State University: Bachelors of Science - Cybersecurity

Graduated - Jun. 2026

GPA: 3.72

Relevant Courses: Systems Administration, Enterprise Defense, Network Security, Digital Forensics, Cryptography, Computer Networks, Web Development, Software Development, Operating Systems, Computer Architecture and Assembly, Machine Learning and Data Mining

Skills

Coding Languages: C, C++, Java, Bash, HTML, CSS, JavaScript, SQL, Assembly, Node.js, React, Python, Rust

Programs: Visual Studio Code, Visual Studio, Git, Ghidra, GitHub, GDB

Technical Skills: Kibana, Ansible, Terraform, AWS, Ubuntu, Alma, Kali, NixOS, Security Controls

Experience

Security Analyst — ORTSOC:

Sept 2025 - June 2026

- Protected clients such as educational institutions and municipalities throughout Oregon and Washington
- Trained in clinical rotations including: Network Security Monitoring, Assessment, Threat Intelligence, Security Engineering, Threat Hunting, Penetration Testing
- Project management, teamwork experience, client communication, working with classified information

Stagehand — Rhino Staging in Ridgefield, Washington:

June 2023 - present

- Complied with safety regulations while working for nationally touring musicians
 - Communicated effectively with a team was required for safety
 - Operated equipment to build scaffolding, speaker systems and lights for a large concert venue
-

Projects

Honeypot:

2026

- Created T-Pot honeypots behind ORTSOC's firewall, sending alerts to existing elastic infrastructure
- Developed professional teamwork skills in a team of three for a special class credit project
- Set up SSH, Telnet, HTTP, HTTPS, RDP, FTP, SMB/NetBIOS, MySQL and other services
- Configured it to work with client sensors, so honeypots can be offered for clients

Automating WireGuard Setup:

2026

- Created an Ansible playbook to be set up/update WireGuard and its configs when run on a workstation
- Learned WireGuard for this project, and ORTSOC's specifications for it
- Worked asynchronously with other student analysts and wrote comprehensive handoff notes

Custom Shell:

2025

- Modified Xv6 operating system to include more modern OS concepts
 - Implemented net drivers, paging, traps, and syscalls
 - Adapted pre-existing codebase, learned system architecture and maintained clear documentation for future use
-

Interests and Hobbies

I created and maintained a home lab using NixOS. I'm involved in Women in Cybersecurity (WiCyS) and participated in CTFs. I enjoy identifying vulnerabilities my old devices, such as my iPod touch, Kindle, Wii U, and Samsung tablet.

Additionally, I like rock climbing, running, soccer and basketball, jewelry making, flute, saxophone, trumpet, piano, guitar, D&D and MTG
